

Step 1: Create a Git Repository

- Open GitHub and log in.
- Click on **New Repository**.
- Name the repository as **your enrollment number** (e.g., 123456789).
- Add a description (optional).
- Select **Public** or **Private** based on your requirement.
- Check "**Add a README file**" (optional).
- Click on **Create repository**.

Step 2: Clone the Repository

- Open **Git Bash** or **Terminal**.
- Navigate to the desired directory where you want to clone the repository.
- Run the following command:

```
git clone https://github.com/your-username/your-enrollment-number.git
```

- Navigate into the repository:

```
cd your-enrollment-number
```

Step 3: Create Folders

- Create two folders named `Assignment_1` and `Assignment_2`:

```
mkdir Assignment_1 Assignment_2
```

- Verify the folders are created:

```
ls
```

Step 4: Add and Commit Changes

- Add the new folders to the Git staging area:

```
git add Assignment_1 Assignment_2
```

- Commit the changes:

```
git commit -m "Added Assignment_1 and Assignment_2 folders"
```

Step 5: Push Changes to GitHub

- Push the changes to the remote repository:

```
git push origin main
```

Step 6: Create a Word File with Documentation

- Open **Microsoft Word** or **Google Docs**.
- Document each step with screenshots (optional).
- Save the file as **Git_Assignment_Documentation.docx**.
